

KENNETH OKWU

Software Engineer I

EXPERIENCE

SOFTWARE DEVELOPER

Reality AI Lab

May 2025

Remote

- ♣ Designed and built front-end features with ReactJS, expanding Node.js skills for back-end integration, and maintaining code through GitHub pull requests.
- ♣ Debugged and tested features, contributing improvements to open-source projects via GitHub pull requests.
- ♣ Managed code contributions with Git version control and CI/CD workflows.
- ♣ Enhanced open-source AI workflows with new features and documentation.

PHARMACY TECHNICIAN

Del-Rey Pharmacy

Feb 2021

Las Cruces

- ♣ Processed 50 prescriptions/shift with 99.8% accuracy.
- ♣ Streamlined restocking and inventory rotation, cutting waste by 15%.
- ♣ Supported COVID-19 safety protocols in high-volume environment.

EDUCATION

MASTER OF SCIENCE IN SOFTWARE ENGINEERING

The University of Texas At El Paso

Feb 2024 - Dec 2025

El Paso, TX

BACHELOR OF SCIENCE IN COMPUTER SCIENCE

The University of Texas At El Paso

Aug 2017 - May 2023

El Paso, TX

SKILLS

HTML, JavaScript, Python, Flask (Python), Java, Git, Cybersecurity, Agile Methodology, Software Testing, Leadership, Teamwork, Communication, Problem-Solving, Version Control, Technical Documentation.

LANGUAGES

English (Native).

PROJECTS

PORTFOLIO

A web-based portfolio showcasing various interactive applications and projects I've built using HTML, CSS, JavaScript, Python/Flask, and React. The site features a diverse collection of practical tools and games, including AI-powered generators, real-time data applications, and interactive experiences. Each educational tool showcases modern web development, featuring file uploads, document exports, and mobile-responsive design.

LESSON PLAN GENERATOR

Developed a dynamic web-based application with HTML, CSS, JS, and Python/Flask that creates customized lesson plans based on user-defined grade level, language, topic, standards/objectives, and optionally any additional comments. The tool supports uploading reference materials and includes a feature to download the generated plan as a DOCX file.
