

Kenneth O

Software Engineer

* * *

Software Engineer with 9 years of experience delivering full-stack features using JavaScript, ReactJS, Node.js, and Flask. Skilled in Python automation and data-processing workflows, version control, CI/CD pipelines, and software testing, with strong cybersecurity awareness and a track record of effective collaboration through open-source contributions and maintaining production systems. Focused on applying technical leadership and problem-solving to build scalable, well-documented, AI-enabled applications and drive continuous improvement.

EXPERIENCE

Software Developer

Reality AI Lab, Remote — May 2025 – Sep 2025

- Developed and deployed full-stack features from design to launch.
- Designed front-end features with ReactJS, expanding Node.js skills for back-end integration, and maintaining code through GitHub pull requests.
- Contributed to open-source project improvements via GitHub push and pull requests.
- Managed code contributions with Git version control and CI/CD workflows.
- Enhanced open-source AI workflows with new features and documentation.
- Developed Python automation and data-processing scripts to streamline workflows and improve operational efficiency.

Pharmacy Technician

Del-Rey Pharmacy, Las Cruces — Feb 2021

- Processed an average of 150+ prescriptions per week with consistent accuracy, maintaining a low error rate of fewer than 2 issues per 1,000 prescriptions.
- Ensured proper restocking and inventory rotation leading to less discarded medications and smoother operations.
- Performed monthly inspections of all medication storage locations to check expiration dates, remove non-viable drugs, and rotate inventory for timely use of all viable medications.
- Verified all incoming drug orders daily, reported any discrepancies to the pharmacist, and updated inventory records.

EDUCATION

Master of Science in Software Engineering

The University of Texas At El Paso, El Paso, TX — Jan 2024 – Dec 2026

Bachelor of Science in Computer Science

The University of Texas At El Paso, El Paso, TX — Aug 2017 – May 2023

SKILLS

HTML5, CSS3, JavaScript, ReactJS, Python, Flask, Java, Git, SQL, CI/CD, Cybersecurity, Agile (Scrum), Software Testing, Version Control, Technical Documentation, Open-Source Contributions, Leadership, Teamwork, Communication, Problem-Solving, AI Development, Prompt Engineering, Voice AI System Design

LANGUAGES

English (Native)

PROJECTS

Voice-AI

Self Project

AI assistant built with a natural conversational style, adaptive memory, multi-tool reasoning, and API integration. Designed to handle tasks, respond intelligently, and refine its responses using different personas.

Portfolio

Main Website

A web-based portfolio showcasing various interactive applications and projects I've built using HTML5, CSS3, JavaScript, Flask, and React. The site features a diverse collection of practical tools and games, including AI-powered generators, real-time data applications, and interactive experiences. Each educational tool showcases modern web development, featuring file uploads, document exports, and mobile-responsive design.

Lesson Plan Generator

Self Project

Developed a dynamic web-based application with HTML5, CSS3, JS, and Flask that creates customized lesson plans based on user-defined grade level, language, topic, standards/objectives, and optionally any additional comments. The tool supports uploading reference materials and includes a feature to download the generated plan as a DOCX file.
